Metsä Wood Form is birch plywood, in which both sides are overlaid with phenol film and the edges are sealed. Form plywood is the formwork panel of choice for smooth surfaced concrete elements. It can also be used as a multi-purpose, maintenance-free sheathing panel for various other uses. Metsä Wood Form is available in various sizes: standard, L, XL and KingSize.

APPLICATIONS
Concrete Formwork:
Metsä Wood Form is a smooth surface maintenance-free panel for different concrete formwork uses: System shuttering, girder formwork, regeneration panels, element industry and concrete block industry.

The durable overlays ensure smooth concrete cast finish and multiple uses. The number of uses can rise up to 30–100 but is highly dependent on the used overlay, site practice, requirements of concrete finish, the quality of release agent and the maintenance, handling and storage practices.

Use high quality release agent to ensure easier and cleaner release. Make sure that the release agent is suitable with the panel overlay. Clean panels after each use to remove all concrete debris. Seal scratches with water proof paint and fill holes with water resistant filler. Afterwards, apply a fresh coat of release agent prior to each subsequent use.

Other applications:
Metsä Wood Form is a general panel used in variety of applications
- Transport industry: Transport equipment containers, trailer side boards, sliding doors, vehicle and flight cases and other transport boxes, bus floor constructions etc.
- Building applications: Agricultural structures, general interior and exterior building applications
- Other applications: Packaging applications, sport arenas and equipment

MAJOR ADVANTAGES
- Smooth durable overlay
- Light and dimensionally stable
- Strong and rigid
- Easy to clean and re-use
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Can withstand impacts and other forms of bruising
- Environmentally friendly
- Weather and boil proof bonding

BASE PLYWOOD
The base plywood of Metsä Wood Form is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.

OVERLAY
A smooth and durable phenolic film is hot-pressed onto the panel surface. The film consists of special base papers impregnated with phenolic resin. A film with a basis weight of 120 g/m² is normally used. With Form L minimum film weight is 220g/m². Thicker overlays are available by order. Standard film colours are dark brown, light brown, yellow and black. Other colours are available by order. The phenol film is not UV resistant and the colour may change exposed to sunlight over prolonged periods.

SURFACE PROPERTIES
The film surface is semi-glossy, smooth, hard and slippery. It withstands abrasion, is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam. Moisture absorption is minimal.
**THICKNESSES, STRUCTURES AND THICKNESS TOLERANCES OF THE PANELS**

The thickness tolerances fulfill the requirements of standard EN 315 and are in part more stringent than the official requirements.

* Moisture content of the product affects its dimensions
* Average density of Metsä Wood birch plywood is 680 kg/m³ at relative humidity of RH 65%

**BONDING CLASSES**

Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

**FORMALDEHYDE EMISSIONS**

Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Form falls far below the Class E1 requirement of ≤ 0.100 ppm and fulfills also the most stringent requirements in the world (≤ 0.030 ppm). The formaldehyde emission of Metsä Wood Form is approximately 0.017 ppm.

**EDGECALING**

Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The standard color of the edge sealing is dark brown. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

**THICKNESSES, STRUCTURES AND SIZE TOLERANCES**

THICKNESSES, STRUCTURES AND SIZE TOLERANCES

The thicknesses and structures fulfill the requirements of standard EN 315 and are in part more stringent than the official requirements.

**PANEL SIZES**

Metsä Wood Form is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3660 mm
- 1500 / 1525 mm x 2350 / 3000 / 3050 / 3660 / 4110 mm

Metsä Wood Form L is available in sizes:
- 2020 x 4110 mm
- 1870 x 4110 mm
- 1870 x 1870 mm, 2020 x 2020 mm

The first measurement indicates the orientation of the surface veneer grain.

**PACKING**

Metsä Wood Form panels are packed in moisture resistant plastic wrapping.
Metsä Wood FormPLUS plywood is the phenolic film overlaid panel choice for all formwork uses with high concrete surface quality requirements. FormPLUS plywood surface has a special treatment to resist the surface rippling, which ensures the smooth high quality concrete surface from the first use.

Applications
Metsä Wood FormPLUS is a smooth surface, maintenance-free birch plywood panel for different concrete formwork applications: System shuttering, girder formwork, regeneration panels, element industry and concrete block industry.

The durable overlays ensure smooth concrete finish and multiple uses. The number of uses can rise up to 30 – 100 but is highly dependent on the used overlay, site practice, requirements of concrete finish, the quality of release agent and the maintenance, handling and storage practices.

Use high quality release agent to ensure easier and cleaner release. Make sure that the release agent is suitable with the panel overlay. Clean panels after each use to remove all concrete debris. Seal scratches with water proof paint and fill holes with water resistant filler. Afterwards, apply a fresh coat of release agent prior to each subsequent use.

Base Plywood
The base plywood of Metsä Wood FormPLUS is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Overlaid Plywood
A smooth and durable phenolic film is hot-pressed onto the panel surface. The film consists of special base papers impregnated with phenolic resin. A film with a basis weight of 220 g/m² is normally used. On the backside of the panel, the overlay has Metsä Wood FormPLUS logo imprinted into the panel surface. The overlay can also be ordered with customized logo. Standard film colour is dark brown. The phenol film is not UV resistant and the colour may change if exposed to sunlight over prolonged periods.

Surface Properties
The Metsä Wood FormPLUS plywood panel surface has a special treatment which makes the surface moisture repellent. Hence the FormPLUS panel surface is able to remarkably reduce surface rippling and provides a smooth concrete cast surface from the first use. The treatment is applied to the concrete side only, which normally has dark brown phenolic film without a logo. The backside of the panel has a film overlay with imprinted Metsä Wood FormPLUS logo.

The phenolic film surface is semi-glossy, smooth, hard and slippery. It withstands abrasion, is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam. Moisture absorption is minimal.

Major Advantages
- Surface resists rippling
- Smooth durable overlay
- Light and dimensionally stable
- Strong and rigid
- Easy to clean and re-use
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Can withstand impacts and other forms of bruising
- Environmentally friendly
- Weather and boil proof bonding
EDGE SEALING
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

PANEL SIZES
Metsä Wood FormPLUS is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3650 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3600 / 3660 mm
The first measurement indicates the orientation of the surface veneer grain.
Other sizes are available on request.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

LENGTH / WIDTH TOLERANCE
< 1000 mm ±1 mm
1000-2000 mm ±2 mm
> 2000 mm ±3 mm
Squareness ±0.1 % or ±1 mm/m
Edge straightness ±0.1 % or ±1 mm/m

THICKNESS, STRUCTURES AND THICKNESS TOLERANCES
The thickness tolerances fulfil the requirements of standard EN 315 and are in part more stringent than the official requirements.

* Moisture content of the product affects its dimensions.
* Average density of Metsä Wood birch plywood is 680 kg/m³ (at relative humidity of RH 65%).
* Special structures and thicknesses are available on request.
* Customised tolerances are possible but must be agreed separately.

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).
The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

FORMALDEHYDE EMISSIONS
Determined according to EN 717-2, the formaldehyde emitted by Metsä Wood FormPLUS falls far below the Class E1 requirement of ≤ 3.5 mg/(m²*h). The formaldehyde emission of Metsä Wood FormPLUS is approximately 0.2–0.3 mg/(m²*h).

PANEL STRENGTH PROPERTIES
Metsä Wood FormPLUS strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Birch Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.
The Concrete formwork design data (permissible concrete pressure tables, design nomograms) for all Metsä Wood formwork panels can be found in Metsä Wood Concrete Formwork technical data.

MACHINING
Metsä Wood FormPLUS plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood FormPLUS panels are packed in moisture resistant plastic wrapping.

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to alteration of its products, product information and product range without any notice.
Metsä Wood Form XL is a larger size birch plywood panel with smooth phenolic overlay. Form XL is a tough-surfaced, durable shuttering panel for demanding formwork applications. The durable overlays and large panel size ensure multiple uses and a high quality concrete finish with fewer joints. XL panels enable larger one piece competents.

APPLICATIONS
Concrete formwork
Metsä Wood Form XL is suitable for highly demanding concrete formwork applications:
- Shuttering systems
- Concrete element industry
- Girder formwork

Transport industry
High quality large size Form XL panels can be used in various transport industry applications:
- Trailer bulkheads, side panels and back boards, agricultural trailers
- Trailer floors
- Bus floor constructions, luggage area floors

BASE PLYWOOD
The base plywood of Metsä Wood Form XL is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive. The core panel of the large size Form XL is scarf-jointed from standard size birch plywood panels using weather resistant melamine or resorcinol adhesive.

OVERLAY
The panel is overlaid with durable and hard phenolic overlay. Standard overlay colours are yellow and dark brown. The reverse side is normally overlaid with similar overlay than the top face.

The durable overlays ensure smooth concrete cast finish and multiple uses. The number of uses can rise up to 30 – 100 but is highly dependent on the used overlay, site practice, requirements of concrete finish, the quality of release agent and the maintenance, handling and storage practices.

Use high quality release agent to ensure easier and cleaner release. Make sure that the release agent is suitable with the panel overlay. Clean panels after each use to remove all concrete debris. Seal scratches with water proof paint and fill holes with water resistant filler. Afterwards, apply a fresh coat of release agent prior to each subsequent use.

MAJOR ADVANTAGES
- Durable and weather resistant overlay
- Larger sizes with unvisible joints
- Strong and rigid
- Easy to clean and re-use
- Good chemical resistance
- Dimensionally stable
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Withstands impacts and other forms of bruising
- Environmentally friendly
- Weather and boil proof bonding

SURFACE PROPERTIES
Metsä Wood Form XL surface is smooth, hard and scratch resistant and withstands abrasion. The surface is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam.

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 5666 Part 8 / WBP

The scarf joint is glued with weather resistant melamine or resorcino1 adhesive.

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Form XL falls far below the Class E1 requirement of ≤ 0.100 ppm and fulfils also the most stringent requirements in the world (≤ 0.030 ppm). The formaldehyde emission of Metsä Wood Form XL is approximately 0.017 ppm.

PANEL STRENGTH PROPERTIES
Due to the scarf jointed core plywood, the strength values of Metsä Wood Form XL in the longitudinal direction of the panel are ca. 65% of standard Metsä Wood Birch plywood values. In the cross direction of the panel the strength values are similar to standard Birch plywood. Stiffness values in both directions are similar to standard Birch plywood.

Birch Ply
Deck
Deck L

Metsä Wood Deck is phenol film overlaid birch plywood with a rough wire mesh pattern. The rough-surfaced Deck is durable, multipurpose flooring panel. Metsä Wood Deck is available in various sizes: standard, L, XL and KingSize.

APPLICATIONS
Metsä Wood Deck is an ideal panel for applications that require highly wear-resistant and rough surfaces:
• **Transport industry**: Vehicle floors (trailers, trucks, lorries, busses, vans etc.), railway wagons, ship decking, transport platforms etc.
• **Building applications**: Warehouse and factory hall floors, loading docks, pedestrian bridges, piers, parking facilities, warehouse shelves, scaffolding etc.

MAJOR ADVANTAGES
• Durable and weather resistant overlay
• Slip resistant wire mesh surface
• Light and dimensionally stable
• Strong and rigid
• Withstands impacts and other forms of bruising
• Easy to machine and fasten using conventional woodworking tools and fasteners
• Easy to clean
• Good chemical resistance
• Environmentally friendly
• Weather and boil proof bonding

BASE PLYWOOD
The base plywood of Metsä Wood Deck is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.

OVERLAY
The panel is overlaid with a durable phenolic film, and a rough wire mesh pattern is pressed into the surface during hot-pressing. A smooth phenolic film is normally applied to the reverse side. A film with a basis weight of 120g/m² is generally used, but standard panel sizes are available also with 220g/m² film. Metsä Wood Deck L is available only with 220 g/m² film.

Standard film colours are dark brown and black. Other colours can be available by order. The phenol film is not UV resistant and the colour may change if exposed to sunlight over prolonged periods.

SURFACE PROPERTIES
Metsä Wood Deck surface is wire mesh patterned. The surface is hard, rough and highly resistant to abrasion and rolling wear. The surface is also moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam.

ABRASION AND ROLLING WEAR RESISTANCE OF METSÄ WOOD DECK (VALUES ARE INDICATIVE AND VALID FOR NEW UNUSED PANELS)

</tr>
</tbody>
</table>

* Abrasion resistance is tested according to EN 438-2 / DIN 53799
** Rolling wear resistance is determined by method corresponding to SS 923508. Rolling wear is an average calculated from the random rolling movements with a load of 200 kg, before the first signs of breakdown occur.
EDGE SEALING
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The standard colour of the edge sealing is dark brown. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Deck is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 / 4110 mm

Metsä Wood Deck L is available in sizes:
- 2020 x 4110 mm
- 1870 x 4110 mm
- 1870 x 1870 mm, 2020 x 2020 mm

The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request. Larger size scarf-jointed XL and KingSize panels are also available by special order.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

FURTHER INFORMATION
- Metsä Wood Deck Declaration of Performance (www.metsawood.com/dop)
- Metsä Wood Transport brochure
- Metsä Wood Deck XL Product Data Sheet
- Metsä Wood KingSize Product Data Sheet
Metsä Wood Deck XL is a larger size birch plywood panel with a wire mesh phenolic overlay. Deck XL is a slip resistant flooring panel for demanding transport applications. XL panels enable larger one piece components.

APPLICATIONS
Metsä Wood Deck XL is suitable for applications that require large size panels with highly wear-resistant and rough surface. Larger panels facilitate and accelerate installation and provide structures with a high degree of rigidity.

• Transport industry: Trailer, bus, truck and van floors; passenger car floors, railway wagon floors, container floors and ship decking
• Building applications: Warehouse and factory hall floors, parking facilities, loading docks, piers, stages and sport stands

MAJOR ADVANTAGES
• Durable and weather resistant overlay
• Slip resistant wire mesh surface
• Larger sizes with unvisible joints
• Strong and rigid
• Light and dimensionally stable
• Withstands impacts and other forms of bruising
• Easy to machine and fasten using conventional woodworking tools and fasteners
• Easy to clean
• Good chemical resistance
• Environmentally friendly
• Weather and boil proof bonding

BASEPLYWOOD
The base plywood of Metsä Wood Deck XL is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

The core panel of the large size Deck XL is scarf-jointed from standard size birch plywood panels using weather resistant melamine or resorcinol adhesive.

OVERLAY
A durable phenolic film is hot-pressed onto the panel surface. Standard colour is dark brown 220 g/m². The reverse side is a smooth phenolic film.

SURFACE PROPERTIES
Metsä Wood Deck XL surface is wire mesh patterned. The surface is hard and withstands abrasion and rolling wear, is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam.

ABRASION AND ROLLING WEAR RESISTANCE OF METSÄ WOOD DECK XL (VALUES ARE INDICATIVE AND VALID FOR NEW UNUSED PANELS).

</table>

* Abrasion resistance is tested according to EN 438-2 / DIN 53799
** Rolling wear resistance is determined by method corresponding to SS 923508. Rolling wear is an average calculated from the random rolling movements with a load of 200 kg, before the first signs of breakdown occur.
**EDGE SEALING**

Panel edges are sealed against moisture absorption with acrylic edge sealing paint. Standard colour is dark brown. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

**PANEL SIZES**

Metsä Wood Deck XL length 4110 to 6000 and/or width 2020 to 2200 mm. Smaller panel sizes without scarf joint are available in standard and L sizes.

The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request.

**SIZE TOLERANCES**

Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**BONDING CLASSES**

Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

The scarf joint is glued with weather resistant melamine or resorcinoil adhesive.

**FORMALDEHYDE EMISSIONS**

Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Deck XL falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfills also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Deck XL is approximately 0,017 ppm.

**PANEL STRENGTH PROPERTIES**

Due to the scarf jointed core plywood, the strength values of Metsä Wood Deck XL in the longitudinal direction of the panel are ca. 65% of standard Metsä Wood Birch plywood values. In the cross direction of the panel the strength values are similar to standard Birch plywood. Stiffness values in both directions are similar to standard Birch plywood.

**MECHANICAL PROPERTIES OF METSÄ WOOD DECK XL**

**MOISTURE CONTENT 12%. THE VALUES ARE EN 789 VALUES.**

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to make alterations to its products, product information and product range without prior notice.
Metsä Wood Floor is multilayer phenol film overlaid birch plywood with a rough wire mesh pattern. The rough-surfaced Floor is a heavy-duty, multipurpose plywood flooring panel for applications requiring a reliable, long-lasting anti-slip surface. Metsä Wood Floor is available in various sizes: standard, L and XL.

APPLICATIONS
Metsä Wood Floor is an ideal panel for transport applications that require highly wear-resistant and rough surfaces:
- Vehicle floors (trailers, trucks, lorries, vans etc.)
- Railway wagon floors
- Ship decking
- Transport platforms

Metsä Wood Floor can also be used in other heavy-duty flooring applications.

BASE PLYWOOD
The base plywood of Metsä Wood Floor is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.

OVERLAY
The panel is overlaid with a durable phenolic film, and a rough wire mesh pattern is pressed into the surface during hot-pressing.

There are two different overlay thicknesses and wire mesh patterns available:
- Tight wire mesh Floor 500
- Coarse wire mesh Floor 700

The phenolic film is also applied to the reverse side and this side is normally smooth. Standard film colour is dark brown. The phenol film is not UV resistant and the colour may change if exposed to sunlight over prolonged periods.

SURFACE PROPERTIES
The panel has a rough and hard surface. Thick multi-layer overlay can withstand highly abrasive and rolling wear. The surface is also moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam.

ABRASION AND ROLLING WEAR RESISTANCE OF METSÄ WOOD FLOOR (VALUES ARE INDICATIVE AND VALID FOR NEW UNUSED PANELS).

- Metsä Wood Transport brochure
Metsä Wood Granit is birch plywood panel overlaid with special decorative overlay. The panel surface has wire mesh or raised Top pattern. High visual quality and wear-resistant surface makes Granit durable, multipurpose plywood flooring panel. Metsä Wood Granit is available in standard, Large and XL sizes.

APPLICATIONS
Metsä Wood Granit is an ideal panel for applications that require visual high quality surfaces:
- Granit has been developed for especially light transport end uses

OVERLAY
The film surface is semi-glossy, hard and resistant to impact and abrasion. Granit surface has grey decorative print. The smooth dark brown phenolic film is applied to the reverse side as a backer.

The surface options are:
- Metsä Wood Granit Deck: wire mesh pattern
- Metsä Wood Granit Top: raised round pattern

SURFACE PROPERTIES
The surface is hard and resistant to abrasion. The surface is also UV light and moisture resistant, and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean.

BASE PLYWOOD
The base plywood of Metsä Wood Granit is Metsä Wood Birch, which made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.
EDGE SEALING
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The standard colour of the edge sealing is grey. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Granit is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 / 4110 mm
Metsä Wood Granit L is available in sizes:
- 1870 x 4110 mm
- 1870 x 1870 mm
The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

FORMALDEHYDE EMISSIONS
Determined according to EN 717-2, the formaldehyde emitted by Metsä Wood Granit falls far below the Class E1 requirement of ≤ 3.5 mg/(m²*h). The formaldehyde emission of Metsä Wood Granit is approximately 0.6 mg/(m²*h).

PANEL STRENGTH PROPERTIES
Metsä Wood Granit is a CE marked product and its strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Granit Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

Due to the scarf jointed core plywood, the strength values of Metsä Wood Granit Deck XL in the longitudinal direction of the panel are ca. 65% of standard Metsä Wood Birch plywood values. In the cross direction of the panel the strength values are similar to standard Birch plywood. Stiffness values in both directions are similar to standard Birch plywood. Granit Deck XL strength and elasticity properties can be found in the Metsä Wood Deck XL Product Data Sheet.

MACHINING
Metsä Wood Granit plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood Granit plywood panels are packed in moisture resistant plastic wrapping.

Birch Ply Integra

Metsä Wood Integra is a new generation overlaid plywood panel with excellent adhesion and painting properties. The durable surface allows the panel to be used in multiple end uses e.g. bonded floor constructions in vehicle frames, painted interior and exterior applications and concrete formwork.

APPLICATIONS
Metsä Wood Integra with a tailor-made overlay ensures a durable finish with excellent adhesion and painting properties. Integra has a wide application range from paint-base panel to gluable floor components and concrete formwork panels. Integra panels are available in a wide range of thicknesses and sizes.

- **Transport**: Bus floors constructions, glued trailer floors, transport boxes
- **Concrete Formwork**: Smooth and maintenance-free panel for different formwork uses.
- **Building**: General interior and exterior building applications, hoarding panels, general paint-base panel, agricultural structures, showrooms and displays, stage constructions
- **Other**: Traffic signs, sports arenas and equipment, packaging applications

### MAJOR ADVANTAGES
- **Versatile panel**
  - Durable overlay
  - Surface can be painted or glued
  - Smooth surface formwork panel
  - Easy to machine and fasten by using conventional woodworking tools
  - Easy to clean
- **Light and dimensionally stable**
  - Strong and rigid
- **Excellent adhesion**
  - Good physical bonding for various adhesives
- **Easy paintability**
  - Smooth and uniform paint finish
  - Saves painting time and costs
  - Suitable for many commercial paint types
- **Environmentally friendly**
  - Low formaldehyde emissions
  - PEFC certified

### BASE PLYWOOD
The base plywood of Metsä Wood Integra is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.
OVERLAY AND SURFACE PROPERTIES

Metsä Wood Integra Form film surface is smooth, semi-matt, hard and slippery. The durable Integra Form overlay ensures matt, smooth concrete cast finish and multiple uses. Use high quality release agent to ensure easier and cleaner release.

Metsä Wood Integra Deck has a non-slippery wire mesh surface with excellent gluing properties.

Integra overlay withstands abrasion, is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean. Moisture absorption is minimal. Colour of the overlay is red brown. There can be colour variation between the panels and different production lots. The compatibility of a surface coating or a glue type should be confirmed from the supplier. Additionally a test coating/gluing is recommended prior to use.

Metsä Wood Top is a phenolic film overlaid birch plywood panel with a raised pattern. High visual quality and wear-resistant surface makes Top multipurpose plywood flooring panel. Metsä Wood Top is available in standard and L sizes.

APPLICATIONS
Metsä Wood Top is an ideal panel for applications that require high quality visual and wear resistant surface:
- **Transport industry**: Vehicle floors (trailers, trucks, lorries, busses vans, etc.), railway wagon floors, ship decking, transport platforms etc.
- **Building applications**: Working platforms, scaffolding, stages, warehouse and factory hall floors, loading docks, pedestrian bridges, warehouse shelves etc.

BASE PLYWOOD
The base plywood of Metsä Wood Top is Metsä Wood birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

OVERLAY
The patterned phenolic film surface is dark brown, semi-glossy, hard and resistant to impact and abrasion. The phenolic film is also applied to the reverse side which is smooth.

The phenol film is not UV resistant and depending on the overlay type the colour may change if exposed to sunlight over prolonged periods.

SURFACE PROPERTIES
The surface is hard and resistant to abrasion and rolling wear. The surface is also moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or stream.

MAJOR ADVANTAGES
- Durable and weather resistant overlay
- Slip resistant raised pattern surface
- Light and dimensionally stable
- Strong and rigid
- Withstands impacts and other forms of bruising
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Easy to clean
- Good chemical resistance
- Environmentally friendly
- Weather and boil proof bonding

* Abrasion resistance is tested according to EN 438-2 /DIN 53979
** Rolling wear resistance is determined by method corresponding to SS 923508. Rolling wear is an average calculated from the random rolling movements with a load of 200 kg, before the first signs of breakdown occur.

EDGE SEALING
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The standard colour of the edge sealing is dark brown. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Top is available in sizes:
- 1200 / 1200 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 / 4110 mm

Metsä Wood Top L is available in sizes:
- 2020 x 4110 mm
- 1870 x 4110 mm
- 1870 x 1870 mm, 2020 x 2020 mm

The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

www.metsawood.com/plywood

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Top falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfills also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Top is approximately 0,017 ppm.

MACHINING
Metsä Wood Top plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood Top panels are packed in moisture resistance plastic wrapping.

FURTHER INFORMATION
- Metsä Wood Top Declaration of Performance
- Metsä Wood Transport brochure

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to make alterations to its products, product information and product range without prior notice.
Metsä Wood Sonex Light is a birch plywood sandwich panel with good sound reduction properties. Its main end uses are in transportation industry like buses and trains. Sonex Light panels are composite structures made out of plywood and sound reduction material.

APPLICATIONS
Metsä Wood Sonex Light is an ideal solution for applications which require good sound insulation, high strength and elasticity properties. Sonex Light panel is perfectly suited for light structures where low weight is a priority.

Benefits in transport uses are:
- Good strength / weight – ratio and high durability
- Less fuel consumption – Reduction of CO2 emissions of a vehicle

Sonex Light applications:
- **Transport industry:** Bus and train walls and floors to reduce noise levels in the passenger cabin areas.
- **Building applications:** Partition walls requiring high acoustic insulation

MAJOR ADVANTAGES
- Good sound reduction properties
- Light and dimensionally stable
- Strong and rigid
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Available with various technically and / or visually high quality overlays
- Good chemical resistance and durability of overlaid products
- Environmentally friendly

BASE PLYWOOD
Metsä Wood Sonex Light is a composite panel consisting of Metsä Wood birch plywood and Amorim Cork composite sound reduction material. The base plywood of Sonex Light is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

OVERLAY AND SURFACE PROPERTIES
Metsä Wood Sonex Light standard surfaces are uncoated. Surfaces are also available with variety of technically or visually high quality overlays. Generally all standard birch plywood overlays e.g. thermoset or thermoplastic overlays are available.

In addition Sonex Light is also available with Phoenix overlay which significantly enhances the fire performance of the panel. Surface properties are dependent on overlay type. For more information on the overlay selection and the surface properties of a single overlay type, please contact Metsä Wood Plywood sales or see particular Product Data Sheet (e.g. Metsä Wood Form, Metsä Wood Phoenix).

SOUND INSULATION
- **Sonex Light 16 mm : 31 dB**
- **Sonex Light 13 mm : 30 dB**
- **REF Birch Plywood 15 mm : 26 dB**
**NOMINAL THICKNESS (mm)** | **SOUND REDUCTION INDEX* Rw (dB)**
--- | ---
13 | 30
16 | 31
19 | 31

* The sound reduction index R was measured in accordance with EN ISO 10140-2:2010 and the weighted sound reduction index Rw was determined in accordance with EN ISO 717-1:1996.

Special structures with higher sound insulation properties are available on request.

**EDGES**

In standard Metsä Wood Sonex Light products the edges are not painted or otherwise sealed. Edge protection with acrylic edge sealing paint is available for overlaid panels on special request.

**PANEL SIZES**

Metsä Wood Sonex Light is available in sizes:
- 1250 mm x 2500 mm
- 1525 mm x 3050 mm

The first measurement indicates the orientation of the surface veneer grain.

Other sizes are available on request.

**SIZE TOLERANCES**

Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**BONDING CLASSES**

Metsä Wood Sonex Light base plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

Sonex Light sandwich panel meets the standard EN 314-2 requirements.

**FIRE CLASSIFICATION**

The fire performance of Metsä Wood Sonex Light has been tested according to several standards and directives:
- Approval directive 95/28/EC
- Approval FMVSS 302
- DIN 5510-2 – S3, SRT2, ST2

Other approvals for railway industry are listed in the Metsä Wood Phoenix Product Data Sheet.

**FORMALDEHYDE EMISSIONS**

Determined according to EN 717-2, the formaldehyde emitted by Metsä Wood Sonex Light falls far below the Class E1 requirement of ≤ 3.5 mg/(m²*h). The formaldehyde emission of Metsä Wood Sonex Light is approximately 0.7 mg/(m²*h).

---

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to alteration of its products, product information and product range without any notice.
Metsä Wood Phoenix plywood products provide enhanced fire performance for uses in transport industry. The product range consists of birch plywood and Sonex Light sound-absorbing sandwich panels overlaid with a special aluminium overlay. Phoenix products meet the requirements of many demanding end use applications.

APPLICATIONS
The combination of fire performance, sound insulation properties and good strength-to-weight ratio make Phoenix an excellent choice for various applications in transport industry, like railway wagons and bus floors.

MAJOR ADVANTAGES
- Enhanced fire performance
- Good sound reduction properties with Phoenix Sonex Light
- Versatile uses – surface can be painted or overlaid
- High strength/weight ratio
  - Strong and rigid
  - Light and dimensionally stable
- Air tight surface
  - Water vapour barrier
- Environmentally friendly
  - No endangered wood species
  - No hazardous chemicals
  - Low formaldehyde emissions
  - PEFC certified

BASE PLYWOOD
The base plywood of Metsä Wood Phoenix Birch is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

The base plywood of Metsä Wood Phoenix Sonex Light is Metsä Wood Sonex Light, which is a composite panel consisting of Metsä Wood birch plywood and Amorim Cork composite sound reduction material.

OVERLAY AND SURFACE PROPERTIES
Metsä Wood Phoenix has a special aluminium overlay. The primed aluminum overlay allows the surface to be painted or overlaid in the customers’ own process according to the end use requirements. The compatibility of a surface coating or an adhesive should be confirmed from the coating supplier. Additionally a test coating is recommended prior to use.

PANEL EDGES
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The colour of the edge sealing is transparent. Even though the edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.
FIRE CLASSIFICATION
The fire performance of Metsä Wood Phoenix products has been tested according to several standards and directives:

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to alteration of its products, product information and product range without any notice.
Metsä Wood Birch is a high-quality Finnish plywood product sanded on both sides. Birch plywood can be used for a wide range of applications. Metsä Wood Birch is available in various sizes: standard, L, XL and KingSize.

**APPLICATIONS**
Metsä Wood Birch is a multipurpose panel for different uses where a strong and rigid panel is needed.

- **Transport industry**: road transport and railway transport vehicle floors and walls, LNG carriers, container floors, flight cases etc.
- **Building applications**: floor and roof structures, interior cladding, sports hall floors, scaffolding, doors and door surfaces etc.
- **Other applications**: packing applications, furniture, toys etc.

**MAJOR ADVANTAGES**
- Strong and rigid
- Excellent strength-to-weight ratio
- Dimensionally stable
- Smooth, hard and durable surface
- High quality visual surface
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Environmentally friendly
- Weather and boil proof bonding

**BASE PLYWOOD**
Metsä Wood Birch plywood is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.

**SURFACE PROPERTIES**
Metsä Wood Birch plywood panels are sanded on both sides and their surface is smooth, hard and durable. The surface can be treated with standard paints, lacquers, varnishes and protection treatments applicable on wood products. Confirm the compatibility of surface treatment from the supplier.

The surface grades are determined by the grade of the sanded surface veneers as follows:

<table>
<thead>
<tr>
<th>Birch plywood surfaces</th>
<th>Typical properties</th>
</tr>
</thead>
<tbody>
<tr>
<td>S (II)</td>
<td>– painting grade</td>
</tr>
<tr>
<td>BB (III)</td>
<td>– standard grade (patched)</td>
</tr>
<tr>
<td>WG (IV)</td>
<td>– reverse grade</td>
</tr>
</tbody>
</table>

Classification of Metsä Wood Birch surface grade meets EN 635 requirements. For more specific grade data, see Handbook of Finnish Plywood.
PANEL SIZES
Metsä Wood Birch is available in sizes:
• 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3660 mm
• 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 / 4110 mm
Metsä Wood Birch L is available in sizes:
• 2020 x 4110 mm
• 1870 x 4110 mm
• 1870 x 1870 mm, 2020 x 2020 mm
The first measurement indicates the orientation of the surface veneer grain.

Larger size scarf-jointed XL and KingSize panels are also available by special order.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

THICKNESS, STRUCTURES AND THICKNESS TOLERANCES
The thickness tolerances fulfill the requirements of standard EN 315 and are in part more stringent than the official requirements.

Birch Ply
Birch XL

Metsä Wood Birch XL is an extra large size birch plywood panel jointed from standard size panels. Birch XL panels enable larger one piece components. The largest available panel size is 6000 mm x 2200 mm.

APPLICATIONS
Metsä Wood Birch XL is suitable for applications that require large size panels and high technical properties. Larger panels facilitate and accelerate installation and provide structures with a high degree of rigidity.

- **Transport industry:** Trailer, truck, lorry, van and refrigerated trailer floors, container floors, walls and ceilings, passenger car floors, railway wagon floors and ship/boat decking
- **Building applications:** floor and roof structures, concrete element industry, etc.
- **Other applications:** packing applications, furniture, toys etc.

BASE PLYWOOD
The base plywood of Metsä Wood Birch XL is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Birch XL panels are scarf-jointed from standard size birch plywood panels using weather resistant melamine or resorcinol adhesive. The scarf-joints appear as thin, visible lines on both sides of the panel, running perpendicularly to the panel length.

SURFACE PROPERTIES
Metsä Wood Birch XL panels have the same surface properties as the original panels, possibly with slight differences in colouration and gloss between the jointed panels. The surface quality of the wood faced Birch XL panels is BB/BB. Birch XL panels are sanded on both sides.

MAJOR ADVANTAGES
- Large sizes
- Strong and rigid
- Withstands impacts and other forms of bruising
- Available with durable and weather resistant overlays
- Dimensionally stable
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Environmentally friendly
- Weather and boil proof bonding
PANEL SIZES
Metsä Wood Birch XL length 4100 to 6000 and/or width 2000 to 2200 mm. Smaller panel sizes without scarf joint are available in standard and L sizes.

The first measurement indicates the orientation of the surface veneer grain.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

FORMALDEHYDE EMISSIONS

Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Birch XL falls far below the Class E1 requirement of ≤ 0.100 ppm and fulfils also the most stringent requirements in the world (≤ 0.030 ppm). The formaldehyde emission of Metsä Wood Birch XL is approximately 0.013 ppm.

PANEL STRENGTH PROPERTIES

Due to the scarf jointed core plywood, the strength values of Metsä Wood Birch XL in the longitudinal direction of the panel are ca. 65% of standard Metsä Wood Birch plywood values. In the cross direction of the panel the strength values are similar to standard Birch plywood. Stiffness values in both directions are similar to standard Birch plywood.

MECHANICAL PROPERTIES OF METSÄ WOOD BIRCH XL PANELS

MACHINING

Metsä Wood Birch XL plywood panels can be machined according to customer specification on special request.

PACKING

Metsä Wood Birch XL panels are packed in moisture resistant plastic wrapping.

PACKING QUANTITIES

FURTHER INFORMATION

- Metsä Wood Transport brochure
- Metsä Wood KingSize Product Data Sheet
Metsä Wood KingSize is an extra large size birch plywood panel jointed from standard size panels. KingSize panels enable larger one piece components. The largest available panel size is 13700 mm x 2800 mm.

APPLICATIONS
Metsä Wood KingSize is suitable for applications that require large size panels and high technical properties. Larger panels facilitate and accelerate installation and provide structures with a high degree of rigidity.

- Transport industry: Trailer, truck, lorry, van and refrigerated trailer floors, container floors, walls and ceilings, passenger car floors, railway wagon floors and ship/boat decking
- Building applications: Concrete formwork, loading docks, piers, stages and sport stands

BASE PLYWOOD
The base plywood of Metsä Wood KingSize is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive. KingSize panels are scarf-jointed from standard size birch plywood panels using weather resistant melamine or resorcinol adhesive. The scarf-joints appear as thin, visible lines on both sides of the panel, running perpendicularly to the panel length.

OVERLAY
Metsä Wood KingSize panels can be either wood faced or overlaid with phenolic films.

The main KingSize panel options are:
- Metsä Wood Birch KingSize (BB/WG)
- Metsä Wood Form KingSize (smooth surface)
- Metsä Wood Deck KingSize (wire mesh surface)

In the overlaid panels, the reverse side is overlaid with smooth phenolic film.

MAJOR ADVANTAGES
- Extra large sizes
- Strong and rigid
- Withstands impacts and other forms of bruising
- Available with durable and weather resistant overlays
- Dimensionally stable
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Environmentally friendly
- Weather and boil proof bonding
SURFACE PROPERTIES
Metsä Wood KingSize panels have the same surface properties as the original panels, possibly with slight differences in colouration and gloss between the jointed panels. The surface quality of the wood faced KingSize panels is BB/ WG. The scarf-joint may cause a slight variation in the thickness.

Surface properties are dependent on the overlay type. More information on the overlay selection and the surface properties of a single overlay type, contact Metsä Wood Plywood sales or see particular Product Data Sheet (Metsä Wood Birch, Form or Deck).

EDGE SEALING
Panel edges of the overlaid panels are sealed against moisture absorption with acrylic edge sealing paint. The colour of the edge sealing is normally dark brown. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

PANEL SIZES
Maximum size of Metsä Wood KingSize is 13700 mm x 2800 mm.
The first measurement indicates the orientation of the surface veneer grain.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

The Concrete formwork design data (permissible concrete pressure tables, design nomograms) for all Metsä Wood formwork panels can be found in Metsä Wood Concrete Formwork technical data.

MACHINING
Metsä Wood KingSize plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood KingSize panels are packed either in covered pallets or moisture resistant plastic wrapping. The packing quantities must be agreed case by case.

FURTHER INFORMATION
- Metsä Wood Transport brochure
- Metsä Wood Concrete Formwork brochure
- Metsä Wood Concrete Formwork technical data

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Birch Ply

SP

Metsä Wood SP is birch plywood panel overlaid with a weatherproof paint base paper. SP provides a reliable and crack resistant painting substrate. The ready to paint surface is suitable for both interior and demanding exterior applications.

APPLICATIONS
Metsä Wood SP is a general paint base panel for various applications:

- **Building applications**: Interior and exterior cladding, showrooms and displays, traffic noise barriers, stage constructions
- **Transport industry**: Walls and bulk heads in trailers and containers
- **Other applications**: Traffic signs, information signs, billboards, playground equipment, furniture

MAJOR ADVANTAGES
- Smooth, durable and ready to paint surface
- Suitable for most commercial paint types
- Painted and edge sealed panel is weather and UV resistant
- Light and dimensionally stable
- Strong and rigid
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Can withstand impacts and other forms of bruising
- Environmentally friendly
- Weather and boil proof bonding

BASE PLYWOOD
The base plywood of Metsä Wood SP is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

OVERLAY
The overlay is lightly impregnated paper, which provides reliable painting substrate. Overlays can be applied to both sides (SP/SP), on one side (SP/BB) or with a smooth phenolic film on the reverse surface (SP/film). Film colour is light brown.

SURFACE PROPERTIES
The painting paper forms a ready-to-use, weatherproof painting substrate, which requires no additional preparation. The overlay provides excellent adhesion for an even paint finish.

ABRASION RESISTANCE OF METSÄ WOOD SP

</thead>
<tbody>
<tr>
<td>SP</td>
<td>1000</td>
</tr>
</tbody>
</table>

* Abrasion resistance is tested according to EN 438-2 / DIN 53799
**EDGE SEALING**
Panel edges are sealed at the mill against moisture absorption with acrylic edge sealing paint. The standard colour of the edge sealing is dark brown. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

**PAINTING INSTRUCTIONS**
The following paint types are suitable for Metsä Wood SP plywood: epoxy, polyurethane and alkyd enamel paints as well as water-based exterior paints. In all cases the paint manufacturer’s instructions should be observed. In exterior uses SP plywood should be treated with a primer and top coat paint. The edges, through holes and other machined surfaces should be treated in the similar way as the plain surfaces.

**PANEL SIZES**
Metsä Wood SP is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3600 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3600 / 3660 mm

**SIZE TOLERANCES**
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**BONDING CLASSES**
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

**FORMALDEHYDE EMISSIONS**
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood SP falls far below the Class E1 requirement of ≤ 0,100 ppm. The formaldehyde emission of Metsä Wood SP is approximately 0,050 ppm.

**PANEL STRENGTH PROPERTIES**
Metsä Wood SP is a CE marked product and its strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood SP Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

**MACHINING**
Metsä Wood SP plywood panels can be machined according to customer specification on special request.

**PACKING**
Metsä Wood SP panels are packed in moisture resistant plastic wrapping.

* Moisture content of the product affects its dimensions.
* Average density of Metsä Wood Birch plywood is 680 kg/m³ (at relative humidity of RH 65%)
* Special structures and thicknesses are available on request.
* Customised tolerances are possible but must be agreed separately.
Metsä Wood Laser is interior bonded birch plywood. Laser plywood is available in two options: high quality uncoated, sanded plywood or plywood overlaid with a melamine film.

APPLICATIONS
Metsä Wood Laser is specially developed for laser cutting applications and is mostly used as die cutting plates in the packaging industry. Laser plywood is suitable also for other indoor uses and for applications requiring a colourless glue line with a protective, easy maintenance film surface. Laser is not suitable for outdoor use, because the base plywood bonding is not resistant to weather.

MAJOR ADVANTAGES
• Easy to machine with laser cutting devices
• Strong and rigid
• Light and dimensionally stable
• Easy to work with using conventional woodworking tools and fasteners
• Environmentally friendly
• Easy maintenance film surface

BASE PLYWOOD
Metsä Wood Laser plywood is made of cross-bonded 1.4 mm thick birch veneers and bonded with interior quality melamine modified urea formaldehyde adhesive.

SURFACE GRADES AND OVERLAY
Metsä Wood Laser is available as sanded and uncoated product and as overlaid product with transparent or transparent grey melamine film on both sides.

Metsä Wood Laser uncoated:
Both surfaces are sanded. The grade of surface veneer is BB quality. Uncoated Laser surface grades follow the classification presented in standard EN 635. The uncoated panel surface can be treated with standard paints, lacquers, varnishes and protection treatments applicable on wood products. Confirm the compatibility of a surface treatment from the supplier.

Metsä Wood Laser overlaid:
A smooth melamine film is hot-pressed on both panel surfaces to enhance surface durability.
SURFACE PROPERTIES
With colourless and transparent film, the colour of overlaid Metsä Wood Laser is similar to natural colour of the birch surface. The film surface and BB veneer grade is sufficient for technical applications, but not for visually demanding applications such as furniture. Laser plywood is also available with a transparent grey film.

The film surface is semi glossy, smooth, hard and slippery. It withstands abrasion, is moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The Laser film surfaces are well suited for laser cutting.

EDGES
Metsä Wood Laser product edges are not painted or otherwise sealed.

PANEL SIZES
Metsä Wood Laser is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3050 / 3300 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3300 mm

The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request.

SIZE TOLERANCES
 Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

BONDING CLASSES
Melamine modified urea formaldehyde adhesive is used in the production of interior bonded Metsä Wood Laser plywood. The melamine additive improves the moisture resistance of the glue line compared to that of a standard interior bonding.

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 1 (interior)
- DIN 68705-3 / BFU 20
- BS 6566 Part 8 / type INT and type MR

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Laser falls far below the Class E1 requirement of ≤ 0.100 ppm. The formaldehyde emission of Metsä Wood Laser uncoated is approximately 0.034 ppm and Metsä Wood Laser overlaid is approximately 0.023 ppm.

PANEL STRENGTH PROPERTIES
Metsä Wood Laser is a CE marked product and its strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Laser Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

PACKING QUANTITIES
Metsä Wood Laser panels are packed in moisture resistant plastic wrapping.

PANEL HANDLING INSTRUCTIONS
As wood is a hygroscopic material, the relative humidity of surrounding conditions affects the moisture content of the plywood and therefore the dimensions and flatness of the panel.

Metsä Wood Laser panels should be conditioned properly to the moisture content of the end use application before final use.

FURTHER INFORMATION
- Metsä Wood Laser Declaration of Performance (www.metsawood.com/dop)
Metsä Wood Flex is a birch plywood panel overlaid with a coloured thermoplastic overlay. Flex is available in range of colours and ready finished surfaces. The combination of technical properties with high class surfaces makes Flex an excellent panel for various interior applications. Metsä Wood Flex is available in various sizes: standard, L and XL.

APPLICATIONS
Metsä Wood Flex provides an easy ready finished surface solution.
- Transport industry: Transit and flight cases
- Building industry: Furniture, shop-, kitchen- and sanitary fittings.

MAJOR ADVANTAGES
- High quality surfaces
- Excellent impact and crack resistance
- Easy to fix and cut
- Good wear resistance
- Easy to clean
- Good resistance against most chemicals
- Strong and rigid panel
- Light and dimensionally stable
- Environmentally friendly

BASE PLYWOOD
The base plywood of Metsä Wood Flex is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

FLEX 02 OVERLAY FOR INTERIOR USE
The panel is overlaid with coloured, 0.2 mm thick lightly structured (miniburl) polypropylene overlay.

The overlay is bonded to plywood with water resistant glue. Metsä Wood Flex is available in range of colours: e.g. White02 (RAL 9016), Black02 (RAL 9004), Grey02 (RAL 7040).

FLEX 06 OVERLAY FOR INTERIOR AND EXTERIOR USE
The panel is overlaid with white 0,6 mm thick structured (burl) polypropylene overlay. FLEX 06 is available in colour White06 (RAL 9016).

SURFACE PROPERTIES
The surface of the overlay is slightly structured to improve wear and scratch resistance. Overlay is elastic, tough and does not crack easily. The overlay is safe to use and it is free of chlorine, halogens, plasticizer, formaldehyde and heavy metals.

The surface is easy to clean with water and normal detergents. Strong acids, alkalis and e.g. acetone may cause visual changes on the surface.

Metsä Wood Flex plywood products have very high surface quality and the surface is susceptible to scratches due to its softer appearance, extra caution has to be practised in handling and storing the panels to prevent damage. Extreme moisture penetration may cause visible changes on the appearance of the product.
**THICKNESSES, STRUCTURES AND THICKNESS TOLERANCES**

The thickness tolerances fulfill the requirements of standard EN 315 and are in part more stringent than the official requirements.

* Customised tolerances are possible but must be agreed separately.
Metsä Wood Flex Smooth is a birch plywood overlaid with a smooth and glossy thermoplastic overlay. Flex Smooth has ready finished surface which is UV-resistant and therefore suitable for interior and exterior applications. The combination of superior surface with high technical properties makes Flex Smooth an excellent panel for various applications.

APPLICATIONS
Metsä Wood Flex Smooth provides a larger size ready finished surface solution for the transport industry such as side walls for horse- and box trailers, light and medium size truck side walls, doors and bulk heads.

MAJOR ADVANTAGES
- High quality smooth and glossy surface
- Ideal surface for stickers and decals
- Excellent UV and weather resistance
- Easy to fix and cut
- Easy to clean
- Light and dimensionally stable
- Environmentally friendly

BASE PLYWOOD
The base plywood of Metsä Wood Flex Smooth is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

OVERLAY
The panel is overlaid with smooth and glossy ABS based overlay. The overlay has UV-additives to make it resistant against the sunlight.

The overlay is bonded to plywood with water resistant glue. Metsä Wood Flex Smooth is available in white colour. Flex Smooth surface is covered with blue protection foil in order to avoid damages during transportation and handling.
SURFACE PROPERTIES
The surface of the overlay is smooth and glossy. Overlay is elastic and does not crack easily. It is also moisture and UV resistant. The overlay is safe to use and dispose. It is free of chlorine, halogens, plasticizer, formaldehyde and heavy metals.

The surface is easy to clean with water and normal detergents. Strong acids, alkalis and e.g. acetone may cause visual changes on the surface.

Metsä Wood Flex Smooth plywood products have very high surface quality and the surface is susceptible to scratches due to its softer appearance, extra caution has to be practised in handling and storing the panels to prevent damage. Extreme moisture penetration may cause visible changes on the appearance of the product.

Technical properties of surface
- Colour stability 2 according to EN ISO 3668
- Colour change ΔE < 1.5 according to ISO 4892-2 (600 h)

EDGE SEALING
Panel edges are sealed against moisture absorption with edge sealing paint. The colour of the edge sealing is transparent. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Flex Smooth is available in sizes:
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 mm

The first measurement indicates the orientation of the surface veneer grain.

Other sizes are available on request. Larger size scarf-jointed XL panels are also available by special order.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

The overlay is bonded to plywood with weather resistant adhesive (EN 204 class D4)

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Birch falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfills also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Birch is approximately 0,013 ppm. Thermoplastic overlay does not contain any formaldehyde.

Birch Ply

Flex XL

Metsä Wood Flex XL is a larger size birch plywood panel overlaid with a coloured thermoplastic overlay. Flex XL is available in range of colours and ready finished surfaces which are UV-resistant. The combination of technical properties with high class surfaces makes Flex XL an excellent panel for various applications. XL panels enable larger one piece components.

APPLICATIONS
Metsä Wood Flex XL provides a larger size easy ready finished surface solution.
- Transport industry: Side walls for horse- and box trailers, side walls for light and medium size trucks, doors and bulk heads, van linings, Transit and flight cases
- Building industry: Furniture, shop-, kitchen- and sanitary fittings, Playground equipment, fencing and rebound walls.

BASE PLYWOOD
The base plywood of Metsä Wood Flex XL is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive. The core panel of the large size Flex XL is scarf-jointed from standard size birch plywood panels using weather resistant melamine or resorcinol adhesive.

FLEX 06 OVERLAY
The panel is overlaid with coloured, 0.6 mm thick structured (burl) polypropylene overlay.

The overlay is bonded to plywood with water resistant adhesive. Metsä Wood Flex XL is available in colour White06 (RAL 9016).

SURFACE PROPERTIES
The surface of the overlay is structured to improve wear and scratch resistance. Overlay is elastic, tough and does not crack easily. It is also moisture and UV resistant. The overlay is safe to use and it is free of chlorine, halogens, plasticizer, formaldehyde and heavy metals.

The surface is easy to clean with water and normal detergents. Strong acids, alkalis and e.g. acetone may cause visual changes on the surface.

MAJOR ADVANTAGES
- High quality surfaces
- Excellent impact and crack resistance
- Good weather resistance
- Easy to fix and cut
- Excellent wear resistance
- Easy to clean
- Good resistance against most chemicals
- Strong and rigid panel
- Light and dimensionally stable
- Environmentally friendly
Metsä Wood Flex XL plywood products have very high surface quality and the surface is susceptible to scratches due to its softer appearance, extra caution has to be practised in handling and storing the panels to prevent damage. Extreme moisture penetration may cause visible changes on the appearance of the panel.

Technical properties of product:
- Taper value is approx 10000 R*
- Colour stability 6-7 according to DIN 54404
- Colour change ΔE < 1.5 according to ISO 4892-2 (600 h)
- Crack resistance EN 5696 no cracks
- Impact resistance Class IC3 according to EN 438-2
* Abrasion resistance is tested according to EN 438-2 / DIN 52799

**EDGE SEALING**
Panel edges are sealed against moisture absorption with edge sealing paint. The standard colour of the edge sealing is transparent. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

**PANEL SIZES**
Metsä Wood Flex XL 06 is available in sizes:
- XL 3660-6000 mm x 1500 / 1525 mm
- XL 6000 mm x 1800 / 1900 mm
- XL 6000 mm x 2000 / 2150 mm

The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request.

**SIZE TOLERANCES**
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**LENGTH / WIDTH**
- < 1000 mm ±1 mm
- 1000-2000 mm ±2 mm
- > 2000 mm ±3 mm
- Squaredness ±0.1 % or ±1 mm/m
- Edge straightness ±0.1 % or ±1 mm/m

* Moisture content of the product affects its dimensions.
* Average density of Metsä Wood Birch plywood is 680 kg/m³ (at relative humidity of RH 65%)
* Special structures and thicknesses are available on request.
* Customised tolerances are possible but must be agreed separately.

**BONDING CLASSES**
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

The scarf joint is glued with weather resistant melamine or resinocel adhesive. The overlay is bonded to plywood with weather resistant adhesive (EN 204 class D4).

**FORMALDEHYDE EMISSIONS**
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Birch falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfils also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Birch is approximately 0,013 ppm. Thermoplastic overlay does not contain any formaldehyde.

**PANEL STRENGTH PROPERTIES**
Due to the scarf jointed core plywood, the strength values of Metsä Wood Flex XL in the longitudinal direction of the panel are ca. 65% of standard Metsä Wood Birch plywood values. In the cross direction of the panel the strength values are similar to standard Birch plywood. Stiffness values in both directions are similar to standard Birch plywood.

**FURTHER INFORMATION**
- Metsä Wood Flex Product Data Sheet

This leaflet is provided for information purposes only and no liability or responsibility of any kind is accepted by Metsä Wood or their representatives, although Metsä Wood has used reasonable efforts to verify the accuracy of any advice, recommendation or information. Metsä Wood reserves the right to make alterations to its products, product information and product range without prior notice.
Metsä Wood Tuff MD is a birch plywood panel overlaid with a high quality thermoplastic overlay. Tuff MD is UV-resistant and therefore suitable for interior and exterior flooring applications. The combination of technical properties with high class surfaces makes Tuff MD an excellent panel for various flooring applications.

APPLICATIONS
Metsä Wood Tuff MD provides an easy ready finished surface solution for interior and exterior flooring applications.

Transport industry:
- Floorings for vans and light trailers

Building industry:
- Industrial-, shop-, kitchen- and sanitary floorings
- Working platforms
- Playground furniture

MAJOR ADVANTAGES
- Excellent wear resistance
- Flexible and slip resistant surface
- Excellent impact and crack resistance
- Strong, rigid and dimensionally stable panel
- Easy to fix and cut
- Easy to clean
- Good weather resistance
- Good resistance against most chemicals
- Environmentally friendly

OVERLAY
Metsä Wood Tuff MD panels are overlaid with extra durable mini-diamond patterned (MD) polypropylene based overlay. The overlay provides slip resistance and has UV-additives to make it resistant against the sunlight. The overlay is safe to use and it is free of chlorine, halogens, plasticizer, formaldehyde and heavy metals. The overlay is bonded to plywood with water resistant adhesive. Tuff MD is available in grey colour.

INSTALLATION
Metsä Wood Tuff MD panels can be cut, shaped and drilled using standard wood-working tools. Raw edges and holes should be sealed with a suitable water resistant paint. Tuff MD panels can be easily fastened with conventional screws.

For maximum service life, it is recommended to seal the panel joints with elastic gap-filling sealing compound (figure 1). Panel edges which are exposed to wear are recommended to be protected with edge protection strips (figure 2).
SURFACE PROPERTIES
The surface of Metsä Wood Tuff MD overlay is structured and slip resistant. Overlay is elastic, tough and does not crack easily. It has extremely good wear resistance. It is also moisture and UV resistant and provides hygienic surface. The surface is easy to clean with water and normal detergents. Strong acids, alkalis and e.g. acetone may cause visual changes on the surface.

Technical properties of surface
- Resistance to Surface wear according to EN 438-2 (Taber value) 7500R. Abrasion Class AC5.
- Weather resistance according to ISO 4892-3; ASTM G 154: After 6000h artificial weathering test minimal visual and no technical changes detected on the surface
- Crack resistance EN13696 no cracks
- Impact resistance Class IC3 according to EN438-2

EDGE SEALING
Panel edges are sealed against moisture absorption with edge sealing paint. The standard colour of the edge sealing is transparent. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Tuff MD is available in sizes:
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 mm
The first measurement indicates the orientation of the surface veneer grain.
Other sizes are available on request. Larger size scarf-jointed XL panels are also available by special order.

SIZE TOLERANCES
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

The overlay is bonded to plywood with weather resistant adhesive (EN 204 class D4).

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Birch falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfills also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Birch is approximately 0,013 ppm. Thermoplastic overlay does not contain any formaldehyde.

PANEL STRENGTH PROPERTIES
Metsä Wood Tuff MD strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Birch Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

MACHINING
Metsä Wood Tuff MD plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood Tuff MD panels are packed in covered pallets.
