Metsä Wood Deck is phenol film overlaid birch plywood with a rough wire mesh pattern. The rough-surfaced Deck is durable, multipurpose flooring panel. Metsä Wood Deck is available in various sizes: standard, L, XL and KingSize.

**APPLICATIONS**
Metsä Wood Deck is an ideal panel for applications that require highly wear-resistant and rough surfaces:
- **Transport industry**: Vehicle floors (trailers, trucks, lorries, buses, vans etc.), railway wagon floors, ship decking, transport platforms etc.
- **Building applications**: Warehouse and factory hall floors, loading docks, pedestrian bridges, piers, parking facilities, warehouse shelves, scaffolding etc.

**MAJOR ADVANTAGES**
- Durable and weather resistant overlay
- Slip resistant wire mesh surface
- Light and dimensionally stable
- Strong and rigid
- Withstands impacts and other forms of bruising
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Easy to clean
- Good chemical resistance
- Environmentally friendly
- Weather and boil proof bonding

**BASE PLYWOOD**
The base plywood of Metsä Wood Deck is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

Designed and tailor-made to serve in demanding applications, birch plywood can be ordered with special oriented veneer structures to provide even higher strength and stiffness properties.

**OVERLAY**
The panel is overlaid with a durable phenolic film, and a rough wire mesh pattern is pressed into the surface during hot-pressing. A smooth phenolic film is normally applied to the reverse side. A film with a basis weight of 120 g/m$^2$ is generally used, but standard panel sizes are available also with 220 g/m$^2$ film. Metsä Wood Deck L is available only with 220 g/m$^2$ film.

Standard film colours are dark brown and black. Other colours can be available by order. The phenol film is not UV resistant and the colour may change if exposed to sunlight over prolonged periods.

**SURFACE PROPERTIES**
Metsä Wood Deck surface is wire mesh patterned. The surface is hard, rough and highly resistant to abrasion and rolling wear. The surface is also moisture resistant and can tolerate commonly used chemicals as well as diluted acids and alkalis. The surface is easy to clean with water or steam.

**ABRASION AND ROLLING WEAR RESISTANCE OF METSÄ WOOD DECK**

<table>
<thead>
<tr>

<td>220 g / m$^2$</td>
<td>700</td>
</tr>
</tbody>
</table>

* Abrasion resistance is tested according to EN 438-2 / DIN 53199.
** Rolling wear resistance is determined by method corresponding to SS 923508. Rolling wear is an average calculated from the random rolling movements with a load of 200 kg, before the first signs of breakdown occur.
**EDGE SEALING**
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The standard colour of the edge sealing is dark brown. Even though edge sealing slows down the absorption of moisture into the wood, it does not eliminate it completely.

**PANEL SIZES**
Metsä Wood Deck is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3000 / 3050 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 / 4110 mm
Metsä Wood Deck L is available in sizes:
- 2020 x 4110 mm
- 1870 x 4110 mm
- 1870 x 1870 mm, 2020 x 2020 mm
The first measurement indicates the orientation of the surface veneer grain. Other sizes are available on request. Larger size scarf-jointed XL and KingSize panels are also available by special order.

**SIZE Tolerances**
Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**LENGTH / WIDTH TOLERANCES**

</tr>
<tr>
<td>Edge straightness</td>
<td>±0.1% or ±1 mm/m</td>
</tr>
</tbody>
</table>

**THICKNESSES, STRUCTURES AND THICKNESS TOLERANCES**
The thickness tolerances fulfil the requirements of standard EN 315 and are in part more stringent than the official requirements.

6 Moisture content of the product affects its dimensions
7 Average density of Metsä Wood birch plywood is 680 kg/m³ (at relative humidity of RH 65%)
8 Special structures and thicknesses are available on request
9 Customised tolerances are possible but must be agreed separately

**BONDING CLASSES**
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior).

The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

**FORMALDEHYDE EMISSIONS**
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Deck falls far below the Class E1 requirement of ≤ 0.100 ppm and fulfils also the most stringent requirements in the world (≤ 0.030 ppm). The formaldehyde emission of Metsä Wood Deck is approximately 0.017 ppm.

**PANEL STRENGTH PROPERTIES**
Metsä Wood Deck is a CE marked product and its strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Deck Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

**MACHINING**
Metsä Wood Deck plywood panels can be machined according to customer specification on special request.

**PACKING**
Metsä Wood Deck panels are packed in moisture resistant plastic wrapping.
