Metsä Wood Flex is a birch plywood panel overlaid with a coloured thermoplastic overlay. Flex is available in a range of colours and ready finished surfaces. The combination of technical properties with high class surfaces makes Flex an excellent panel for various interior applications.

**APPLICATIONS**
Metsä Wood Flex provides an easy ready finished surface solution.
- Transport industry: Transit and flight cases
- Building industry: Furniture, shop-, kitchen- and sanitary fittings

**MAJOR ADVANTAGES**
- High quality surfaces
- Excellent impact and crack resistance
- Easy to fix and cut
- Good wear resistance
- Easy to clean
- Good resistance against most chemicals
- Strong and rigid panel
- Light and dimensionally stable
- Environmentally friendly

**BASE PLYWOOD**
The base plywood of Metsä Wood Flex is Metsä Wood Birch, which is made of cross-bonded 1.4 mm thick birch veneers and bonded with weather and boil-resistant phenol formaldehyde adhesive.

**FLEX 02 OVERLAY**
The panel is overlaid with coloured, 0.2 mm thick lightly structured (miniburl) polypropylene overlay.

The overlay is bonded to plywood with water resistant glue. Metsä Wood Flex is available in range of colours: e.g. White02 (RAL 9016), Black02 (RAL 9004), Grey02 (RAL 7040). A light grey balancer foil is also available.

**SURFACE PROPERTIES**
The surface of the overlay is slightly structured to improve wear and scratch resistance. Overlay is elastic, tough and does not crack easily. The overlay is safe to use and is free of chlorine, halogens, plasticizer, formaldehyde and heavy metals.

The surface is easy to clean with water and normal detergents. Strong acids, alkalis and e.g. acetone may cause visual changes on the surface.

Metsä Wood Flex plywood products have very high surface quality and the surface is susceptible to scratches due to its softer appearance, extra caution has to be practised in handling and storing the panels to prevent damage. Extreme moisture penetration may cause visible changes on the appearance of the product.
Technical properties of surface
- Taber value is approx 2000 R depending on overlay*
- Colour stability 6-7 according to DIN 54404
- Colour change ∆E < 1 according to ISO 4892-2 (600 h)
- Crack resistance EN13696 no cracks
- Impact resistance Class IC3 according to EN438-2

* Abrasion resistance is tested according to EN 438-2 / DIN 53799

EDGE SEALING
Panel edges are sealed against moisture absorption with acrylic edge sealing paint. The colour of the edge sealing is transparent, other colours are available on request. Even though edge sealing slows down the absorption of moisture into the panel, it does not eliminate it completely.

PANEL SIZES
Metsä Wood Flex is available in sizes:
- 1200 / 1220 / 1250 mm x 2400 / 2440 / 2500 / 3050 / 3660 mm
- 1500 / 1525 mm x 2500 / 3000 / 3050 / 3660 mm

The first measurement indicates the orientation of the surface veneer grain.

Thickneses, structures and thickness tolerances
The thickness tolerances fulfill the requirements of standard EN 315 and are in part more stringent than the official requirements.

* Moisture content of the product affects its dimensions
* Average density of Metsä Wood birch plywood is 680 kg/m³ (at relative humidity of RH 65%)
* Special structures and thicknesses are available on request
* Customised tolerances are possible but must be agreed separately

BONDING CLASSES
Metsä Wood plywood panels are bonded with a weather and boil-resistant phenol formaldehyde adhesive (WBP, BFU, AW, exterior). The gluing meets the requirements of the following international standards:
- EN 314-2 / Class 3 (exterior)
- DIN 68705-3 / BFU 100
- BS 6566 Part 8 / WBP

The overlay is bonded to plywood with weather resistant adhesive (EN 204 class D4)

FORMALDEHYDE EMISSIONS
Determined according to EN 717-1, the formaldehyde emitted by Metsä Wood Birch falls far below the Class E1 requirement of ≤ 0,100 ppm and fulfills also the most stringent requirements in the world (≤ 0,030 ppm). The formaldehyde emission of Metsä Wood Birch is approximately 0,013 ppm. Thermoplastic overlay does not contain any formaldehyde.

PANEL STRENGTH PROPERTIES
Metsä Wood Flex strength and elasticity properties are identical with the Metsä Wood Birch standard plywood properties. The properties are specified according to standards EN 789 and EN 1058 and can be found in the Metsä Wood Birch Declaration of Performance (DoP). DoP documents can be downloaded from www.metsawood.com/dop.

MACHINING
Metsä Wood Flex plywood panels can be machined according to customer specification on special request.

PACKING
Metsä Wood Flex panels are packed in covered pallets.
