Metsä Wood Sonex Light is a birch plywood sandwich panel with good sound reduction properties. Its main end uses are in transportation industry like buses and trains. Sonex Light panels are composite structures made out of plywood and sound reduction material.

APPLICATIONS
Metsä Wood Sonex Light is an ideal solution for applications which require good sound insulation, high strength and elasticity properties. Sonex Light panel is perfectly suited for light structures where low weight is a priority.

Benefits in transport uses are:
- Good strength / weight – ratio and high durability
- Less fuel consumption – Reduction of CO2 emissions of a vehicle

Sonex Light applications:
- **Transport industry:** Bus and train walls and floors to reduce noise levels in the passenger cabin areas.
- **Building applications:** Partition walls requiring high acoustic insulation

MAJOR ADVANTAGES
- Good sound reduction properties
- Excellent strength-to-weight ratio
- Dimensionally stable
- Strong and rigid
- Easy to machine and fasten using conventional woodworking tools and fasteners
- Available with various technically and / or visually high quality overlays
- Good chemical resistance and durability of overlaid products
- Environmentally friendly

BASE PLYWOOD
Metsä Wood Sonex Light is a composite panel consisting of Metsä Wood birch plywood and Amorim Cork composite sound reduction material. The base plywood of Metsä Wood Sonex Light is Metsä Wood Birch. Birch plywood is made of cross-bonded 1.4 mm thick birch veneers bonded with weather- and boil-resistant phenol formaldehyde adhesive.

OVERLAY AND SURFACE PROPERTIES
Metsä Wood Sonex Light standard surfaces are uncoated. Surfaces are also available with variety of technically or visually high quality overlays. Generally all standard birch plywood overlays e.g. thermoset or thermoplastic overlays are available.

In addition Sonex Light is also available with Phoenix overlay which significantly enhances the fire performance of the panel. Surface properties are dependent on overlay type. For more information on the overlay selection and the surface properties of a single overlay type, please contact Metsä Wood Plywood sales or see particular Product Data Sheet (e.g. Metsä Wood Form, Metsä Wood Phoenix).

SOUND INSULATION

Sonex Light 16 mm : 31 dB
Sonex Light 13 mm : 30 dB
REF Birch Plywood 15 mm : 26 dB
Nominal Thickness (mm) | Sound Reduction Index \( R_w \) (dB)
--- | ---
13 | 30
16 | 31
19 | 31

* The sound reduction index \( R \) was measured in accordance with EN ISO 10140-2:2010 and the weighted sound reduction index \( R_w \) was determined in accordance with EN ISO 717-1:1996.

Special structures with higher sound insulation properties are available on request.

**EDGES**

In standard Metsä Wood Sonex Light products the edges are not painted or otherwise sealed. Edge protection with acrylic edge sealing paint is available for overlaid panels on request.

**PANEL SIZES**

Metsä Wood Sonex Light is available in sizes:
- 1250 mm x 2500 mm
- 1525 mm x 3050 mm

The first measurement indicates the orientation of the surface veneer grain.

Other sizes are available on request.

**SIZE TOLERANCES**

Measured in accordance with standard EN 324, the plywood size and squareness tolerances meet EN 315 requirements.

**PANEL TOLERANCES**

** Formaldehyde Emissions**

Determined according to EN ISO 12460-3, the formaldehyde emitted by Metsä Wood Sonex Light falls far below the Class E1 requirement of \( \leq 3.5 \text{ mg}/(\text{m}^2 \cdot \text{h}) \). The formaldehyde emission of Metsä Wood Sonex Light is approximately 0.7 \text{ mg}/(\text{m}^2 \cdot \text{h})

**FIRE CLASSIFICATION**

The fire performance of Metsä Wood Sonex Light has been tested according to several standards and directives.
- UN/ECE Regulation No. 118, (vertical and horizontal use)
- FMVSS 571.302
- EN 45545-2 - R10: HL1 to HL3 (Sonex Light Phoenix)

Other approvals for railway industry are listed in the Metsä Wood Phoenix Product Data Sheet.

**FORMALDEHYDE EMISSIONS**

Determined according to EN ISO 12460-3, the formaldehyde emitted by Metsä Wood Sonex Light falls far below the Class E1 requirement of \( \leq 3.5 \text{ mg}/(\text{m}^2 \cdot \text{h}) \). The formaldehyde emission of Metsä Wood Sonex Light is approximately 0.7 \text{ mg}/(\text{m}^2 \cdot \text{h})

* Moisture content 12 %
** Properties determined according to EN 789 standards

**MACHINING**

Metsä Wood Sonex Light plywood panels can be edge machined and predrilled according to customer specification on request.

**PACKING**

Metsä Wood Sonex Light panels are packed in moisture-resistant plastic wrapping.
